The 12 cm flexible attachment is used to create custom angles and bends and is mainly used in combination with the RC2 or RC3 inspection camera. This allows different viewing and camera angles to be flexibly adjusted even over longer distances, enabling better inspection of hard-to-reach areas (see the RC2 inspection camera demonstration video). The attachment is also ideally suited for RUNPOSTICKS and all RUNPOTEC pull-in systems with RUNPOTEC RTG thread Ø 6 mm, and enables the simple creation of custom angles and bends.
