DESCRIPTION

RUNPOSTICKS Comfort Set: the new basalt technology allows extreme bending radii, however, the rods retain high dimensional stability. All connections have a RTG Ø 6 mm thread, have no butt edges or thread transitions. Objects weighing up to 2.5 kg can be held with the magnet. In combination with the magnet, the ball chain enables targeted locating or guiding to wall openings. In addition, the Comfort package includes the special sliding hook and can easily overcome obstacles up to 8 cm high thanks to the tilt function. The shockproof LED lamp also included has a very high luminosity and extremely long illumination time due to its AAA Duracell battery. **Cable pulling loop with protective cap** and RUNPOTEC RTG Ø 6 mm thread. The built-in swivel allows the cable to rotate in the pipe. Easy attachment of cables to the loop. Connectors are protected by tensile stress on the cable. The protective cap allows cables with plugs to be pulled through pipes or in other situations while protecting the plug. Also ideally suited for fixing or pulling several cables together. **Optimal area of application:** RUNPOSTICKS - suspended ceilings, cable ducts, hollow walls, retroactive cabling for non-routed cables, underfloor shafts, various bushings and much more. Cable pulling loop: from 14 mm inner diameter and non-routed cables.
