ADVANTAGES

- Practical fastening variant
- Higher cable capacity
- RTG Ø 6 mm thread

DESCRIPTION

The pull loop is a practical fastening option and is ideal for attaching cable pull sockets, ropes, or cables. Compared to conventional eyelets, it allows for greater cable capacity and thus offers more flexibility when pulling in cables. Thanks to the RUNPOTEC thread RTG Ø 6 mm, the pull-through loop is compatible with GF3, RUNPOSTICKS, and GF4.5 and GF6 fiber optic rods.

Scope of supply: 1 x Pull loop with RTG Ø 6 mm thread
