DESCRIPTION

The two foldable lifting supports of the RUNPOLIFTER 4500 cable drum lifter, which can lift drums up to a maximum diameter of 1600 mm and a maximum weight of 4,500 kg, have a 2-stage gearbox. The rapid traverse for the idle lift and the working gear for the load lift. Switching between the two gears can be controlled by pulling out the crank. Thanks to its lightweight construction (22 kg per lifting support), it can be easily transported and yet has excellent stability on a wide variety of ground conditions. When using the RUNPOLIFTER 4500, it is not necessary to pin the raised load because the gearbox is equipped with a self-locking spindle.
A drum shaft (item no.: 20692 or 20693 or 20694) is required for operation.
