DESCRIPTION

Thanks to new basalt technology, extremely tight bending radii are possible, yet the rods retain their shape. No rusting – thanks to stainless steel joints and no sharp edges. The standard RUNPOTEC RTG thread (Ø 6 mm) allows for a wide variety of combinations. The full range of accessories can be screwed on without the need for additional adapters. Ideally suited for use with the RC2 or RC3 inspection camera. Extreme bending radius of 300 mm.
Ideal applications: suspended ceilings, cable ducts, cavity walls, retrofitting cabling in non-conduit systems, underfloor ducts, penetrations, etc.

Scope of supply: 2 x RUNPOSTICKS red Ø 7,5 mm - Length: 2 x 1 m

ADVANTAGES

- 30% higher load capacity due to basalt fibre technology
- Plastic-coated - therefore no penetration of the fibres under the skin
- No rusting
- No hems
- Extreme bending radius
