- Pipe inner diameter 9 – 25 mm

DESCRIPTION

The RP1 is a special plastic cable with a diameter of 4 mm, featuring an RG6 guidance tip at the start of the cable. The guidance tip is fitted with a special eyelet head (diameter 6 mm) with a large eyelet hole and is crimped to the cable.
At the end of the cable is a screw-on pull-eye head (diameter 7 mm) with an RTG thread (diameter 6 mm), which is screwed onto the cable.
The tape is designed for use in small pipe diameters and short pulling distances and offers excellent bending and sliding properties. The seamless finish ensures smooth pulling performance. The total breaking load is 170 kg.

Ideal application: For internal pipe diameters from 9 mm to 25 mm

Scope of supply: 1 x RP1 incl. 1 x pressed RG6 RUNPOGLEITER (guiding head) without swivel at the strap tip and 1 x screwed eyelet head (RUNPOTEC RTG Ø 6 mm) at the strap end
